PROFESSIONAL SUMMARY

Computer Science Engineering graduate with hands-on project experience in Java, JavaScript, ReactJS, Angular, Node.js, Express.js, MySQL, MongoDB, and PostgreSQL. Skilled in developing full-stack web applications, REST APIs, CRUD operations, authentication, role-based access control, and database-driven applications. Strong foundation in Object-Oriented Programming, Data Structures, and Database Design. Ready to bring initiative and end-to-end ownership to solving real-world problems as part of a development team.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, Python, C, C++
- **Frontend Technologies:** HTML, CSS, ReactJS, Angular
- **Backend Technologies:** Node.js, Express.js, Spring Boot
- **APIs:** REST APIs, GraphQL
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Core Computer Science:** Object-Oriented Programming (OOP), Data Structures, Database Design
- **Tools:** Git, GitHub, Visual Studio Code, Android Studio

PROJECTS

Movie Ticket Booking System – MERN

April - 2026

Technologies: MongoDB, Express.js, ReactJS, Node.js

- Built a full-stack movie ticket booking platform using the MERN stack, handling movie listings, seat selection, and the end-to-end booking flow.
- Designed REST APIs for movie listings and seat selection, structured to prevent double-booking of seats.
- Built reusable React components with centralized state management for a consistent booking experience across screens.
- Modeled MongoDB schemas to reliably persist booking and user data.

Order Management REST API

February - 2026

Technologies: Node.js, Express.js, PostgreSQL, JWT

- Built a REST API using Node.js, Express.js, and PostgreSQL to manage products, customers, and orders end-to-end.
- Designed CRUD operations for products, customers, and orders, keeping data handling consistent and reliable.
- Secured API access with JWT-based authentication and role-based access control.
- Modeled relational database tables in PostgreSQL for efficient product, customer, and order data management.
- Added order status tracking to give visibility into order progress from placement to fulfillment.

RecipeForge – Angular

January - 2026

Technologies: Angular, TypeScript

- Built a recipe management web application using Angular and TypeScript.
- Structured reusable Angular components, routing, and forms to keep the codebase maintainable as features grew.
- Added interactive browsing and search features to help users find and manage recipes quickly.
- Designed a responsive UI for a consistent experience across devices.

College Management System – Java and MySQL

December - 2025

Technologies: Java, JDBC, MySQL

- Built a college management system in Java to manage student, staff, course, attendance, and examination records.
- Automated administrative workflows, cutting down manual, paper-based record-keeping.
- Integrated JDBC with MySQL for reliable student and course data storage.
- Designed database operations to keep student and course information accurate and easy to retrieve.

EDUCATION

Mepco Schlenk Engineering College, Sivakasi - B.E. Computer Science and Engineering
CGPA : 6.74

2022 - 2026

S.H.N.V. Higher Secondary School, Sivakasi - HSC
Marks : 74.3%

2020 - 2022

S.H.N.V. Higher Secondary School, Sivakasi - SSLC
Marks : 80.3%

2019 - 2020

CERTIFICATIONS

- **IEEE** – English for Technical Professionals February 2023
- **NPTEL** – Data Mining, IIT Kharagpur May 2024
- **NPTEL** – Google Cloud Computing, IIT Kharagpur November 2024
- **NPTEL** – Introduction to Industry 4.0 and Industrial Internet of Things, IIT Kharagpur April 2025
